

THE WORLD LEADER IN REAL-TIME LIVE STITCHING

StereoStitch Live

Allowing high-resolution full 360° views of your environment

Wishing for 360° replication of your environment?

StereoStitch Live is a key component of any 360° viewing system.

It uses cutting-edge stitching algorithms to enable **real-time** 360° replications of the captured surroundings.

Its seamless, high-resolution outputs allow smooth interaction with your physical environment, opening the door to transformative initiatives that boost task **efficiency** and overall **productivity**.

StereoStitch Live is fully **customizable** to answer the specific needs of demanding clients.
